

REVOLUTIONIZING SEED BOX USE AND MANAGEMENT

Seedbox Solution is all about problem solving. With over 75 years of combined expertise in reusable packaging systems, we are focused on providing products and services that make using seed boxes simpler, easier, and more affordable.

Introducing the **GEN250** - the seed industry's first alternative seed box container for storing, transporting, and discharging bulk seed. The GEN250 offers improved functionality and is designed for easier and more efficient seed handling. It is created with a robust and rigid design that offers the same capacity you are used to, plus features designed to make a seed box fleet more manageable and cost-effective.

Some of the features include:

- Collapse and stack securely together for max efficiency of 66 empties per 53' trailer. Save 34% in return shipping cost!
- 100% stack-and-nest compatible with existing containers in the market, as well as interfacing with seed tenders and being forklift and pallet-jack compatible.
- Check out seedboxsolution.com/gen250-seed-box/ for more features!

66 empty bins per truck, versus 44 alternative bins

Mobile Seed Box Washer

Seedbox Solution created the industry's first **mobile seed box washer**. It is designed to wash all seed box brand containers.

Mobile seed box washers are deployed to the customer's site or warehouse, and our trained staff take care of everything. We will have your inventory of boxes washed within days or weeks and since we come to you, you will be saving both time and freight money.

Our newest feature is called Quick Repair and Wash (QRW) which includes both simple repairs and spare parts installation.

Seed Box Rental Program

Seedbox Solution offers the industry's first **seed box rental program** as a low-cost alternative to capital purchase.

The seed industry is more competitive than ever and with the fluctuations in commodity pricing, companies are looking at every capital expenditure as a savings opportunity.

With Seedbox Solution's rental fleet, seed companies are no longer faced with having to expend large capital sums to expand their number of boxes. Additionally, rented seed boxes are not washed, stored, or serviced by the customer, eliminating a large amount of management cost.

The rental fee for each box is \$124.50. That rental price includes:

- Standard black ready-to-use seed box (base/ring/lid) with two document pouches installed. Each box is identified with two rental stickers.
- Seed box washing upon return and all repairs including welding, pouches, and bent or broken hit plates.
- Rental boxes delivered to your door at no additional cost. Customer is responsible for the return of the boxes to our designated Return Logistics Service Center.
- No minimum rental!
