

RANCONA® V PD. A NEW PEANUT SEED TREATMENT SOLUTION

Rancona® V PD

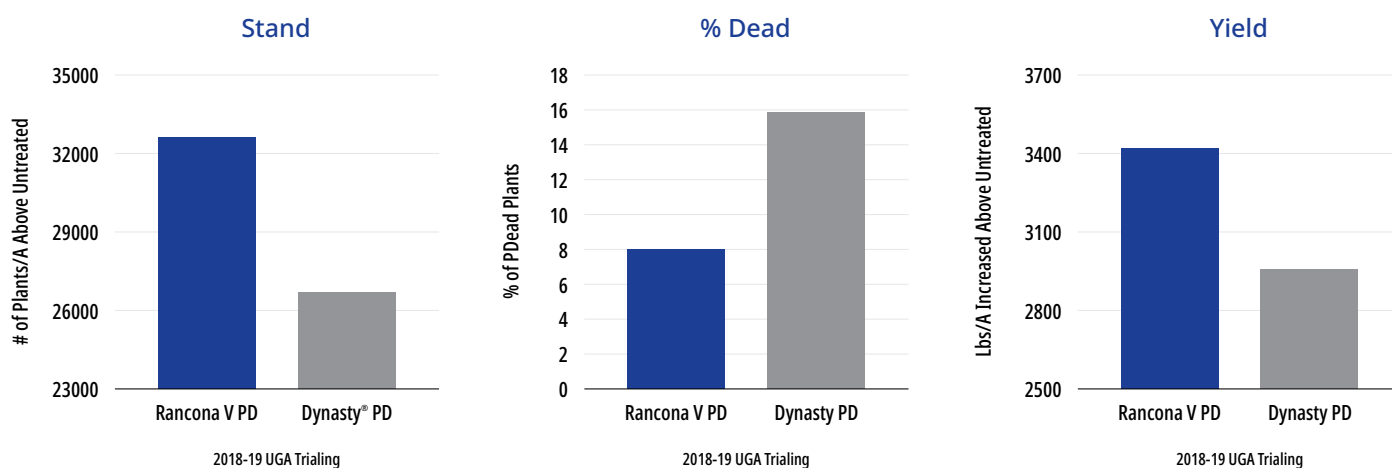

For peanut growers who want proven protection against key peanut diseases, there's RANCONA® V PD seed treatment, a new dust formulation fungicide that ensures you're maximizing your seed treatment investment and maximizing your yield potential.

A HIGHER LEVEL OF DISEASE CONTROL

RANCONA V PD contains three powerful fungicides — ipconazole, carboxin and metalaxyl — that protect against a broad spectrum of yield-robbing peanut diseases. With resistance to Group 11 fungicides reported in peanut-producing regions, RANCONA V PD brings two new modes of action to peanut growers to aid in resistance management.

RANCONA V PD provides both contact and systemic activity, which leads to broad-spectrum control of key peanut diseases, including seed rots, damping off and seedling blights caused by *Aspergillus*, *Rhizoctonia*, *Fusarium* and *Pythium*. It is also effective for partial control of early season white mold/stem rot caused by *Sclerotium rolfsii* and early season black rot caused by *Cylindrocladium parasiticum*.

RANCONA V PD SEED TREATMENT SUMMARY

*Trials were conducted with stressed / low germ seed.

APPLICATION RATES AND DISEASES CONTROLLED

DISEASES CONTROLLED	LABELED RATE (oz product/A)
Seed rot (Caused by seed-borne <i>Penicillium</i> , <i>Aspergillus</i> and <i>Rhizopus</i>)	4 oz/100 lb seed
Seed rot, damping off, seedling blight (Caused by soil-borne <i>Rhizoctonia</i> , <i>Fusarium</i> , <i>Sclerotinia</i> , and <i>Pythium</i>)	
DISEASES PARTIALLY CONTROLLED*	4 oz/100 lb seed
Early season stem rot/white mold (Caused by soil-borne <i>Sclerotinium rolfsii</i>)	
Black rot (Caused by soil-borne <i>Cylindrocladium parasiticum</i>)	

*Partial control can mean either erratic control from good to poor, or consistent control at a level below that which is generally considered acceptable for commercial disease control.

FEATURES & BENEFITS

- Improved, easy-to-use dust formulation that maximizes treatment flowability
- Unique combination of ipconazole, carboxin and metalaxyl fungicides
- Improved germination, seedling vigor and plant health
