Electrical Construction and
Automation Services
Built to Meet Your Needs

UNDERSTANDING NEEDS ► DELIVERING RESULTS

OUR COMPANY

Interstates offers electrical construction, electrical engineering, and control systems services. For over sixty years, we have tackled complex challenges and developed innovative solutions for industrial manufacturing and processing facilities around the world. What started out as a small electric company, has evolved into an organization with over 1,000 employees and multiple locations throughout the United States.

At Interstates we treat each other like family because our team is the foundation for our success. We're focused on building a collaborative work environment based on trust, integrity, and support from one another. One of our core values is family, and that is what drives us to live out our zero-injury culture every day. In the last five years, we have twice reached the major milestone of 1,000,000 manhours without a recordable incident while maintaining an EMR of less than 0.80. Interstates has also been the recipient of several national awards including Associated Builders and Contractors, Inc. (ABC) Contractor of the Year, Control Engineering System Integrator of the Year, and Construction Users Roundtable (CURT) Construction Industry Safety Excellence (CISE) Award in addition to numerous project and safety awards from ABC.

Industries we serve... Bio-Energy | Chemical / Oil & Gas | Consumer Products | Data Centers
Feed & Grain Flour Milling | Food & Beverage | Manufacturing | Oilseeds | Pet Food | Seed Processing

OUR SERVICES

Through our unique integrated project delivery approach, we are able to provide you with one or all of our services. By combining the strength of all our teams, we can develop a solution tailored to your specific needs. Our knowledgeable teams work alongside you to truly understand your needs and deliver exceptional results.

Find the solution to all your electrical construction, engineering, and control systems needs.

Analytics | Application Development | Construction | Control Systems | Cybersecurity Assessments

INTEGRATED DESIGN-BUILD

The bottom line is that Design-Build must help you meet your goals. We believe that we can help you accomplish that. It has been said that Design-Build is more popular than ever, accounting for more and more of all non-residential construction in the USA. When you consider the factors of single-source responsibility, owners ease of use and risk management, Design-Build is the right choice. Interstates is the right Design-Build choice for any size project... ***from concept to completion!***
