

# KEEN SEED FACILITY SERVICES

## KEEN KNOWS SEED

Keen Project Solutions, LLC understands true seedsmanship requires expert experience with flow and efficiency. We're experts in the field, and we'll help you ensure quality products from field to the bag. We strive to ensure your projects are performed safely, completed on time, and stay within budget, so you can maintain your critical harvest schedule.

We respect that seeds are a living organism. They need gentle handling and a thorough process to prevent cross-contamination.

We understand the process flow of many food, agricultural, manufacturing and material handling production methods. From new construction to facility reconditioning, Keen has the experience to safely complete even the most challenging projects.

### COMPREHENSIVE SERVICES

Installing and properly maintaining your system is a necessity for seed purity. Keen is your expert partner in design, equipment procurement, and building. We can help you in commissioning, repair any equipment, and help you plan new equipment installations. We drive design that aligns with your budget, scope, and critical schedule.

### KEEN CHOOSES THE RIGHT EQUIPMENT FOR YOU, INDEPENDENT OF BRAND.

At Keen, we call ourselves equipment agnostics. We choose the right equipment for the job, without being tied to specific brands and manufacturers.

## KEEN INSTILLS CONFIDENCE

We instill confidence through extensive knowledge and build trust with our clients. We work diligently to ensure quality work, while keeping on schedule and never compromising our safety protocol. Our team is deadline-focused and uses Lean planning techniques to break down work phases and tasks efficiently.

While installing equipment within your existing or operating seed facilities is a challenge, our team is comprised of professionals who strive to create workable solutions.

## SEED OPERATIONS WE EXCEL AT

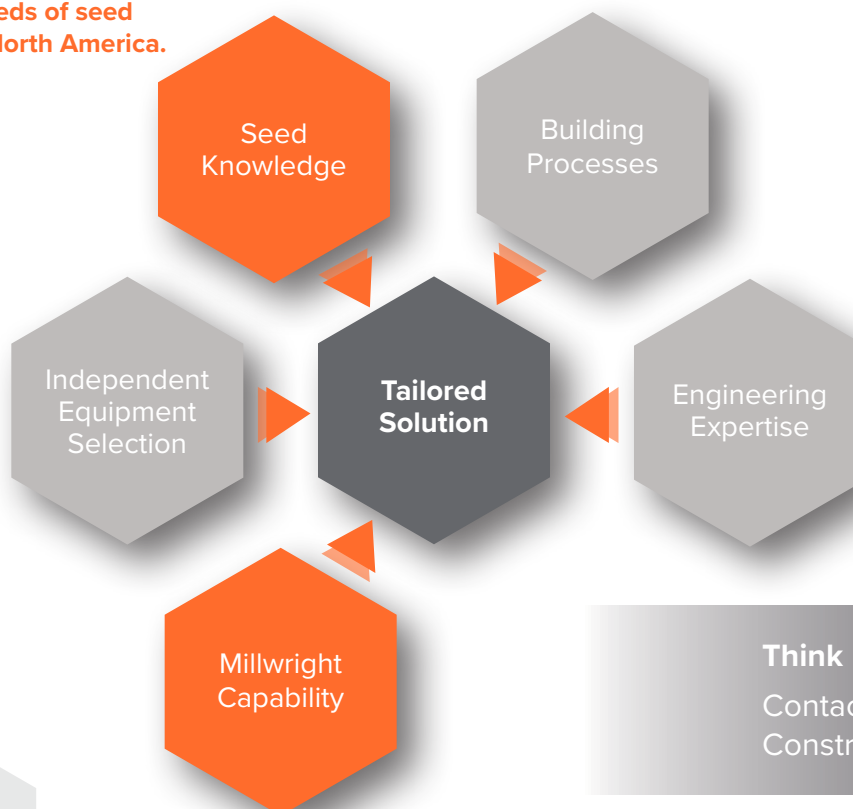

We bring our experience to the table on multiple operations. We're a trusted partner for many seed companies throughout the U.S.
