# Faster Harvest. Cleaner Samples. Enhanced Data.

## The Rx Rotary Plot Combine

### By ALMACO

Revolutionary, patent-pending top feed rotor and advanced air-cleaning system enable faster, more efficient harvest. Excellent for harvesting green stem and higher moisture crops under more adverse conditions.

High-speed unload auger

+40 Bushel grain tank

Sample storage compartment

Automated folding cyclone

The industry's quietest cab

Interchangeable header design for multi-crop applications

4-Wheel Drive

Two-speed hydraulic ground drive

Streamlined design eliminates ledges for fast, easy cleanout

- Microcontroller based operating system for fast, easy diagnostics, adjustments and operation.**
- High resolution color display
  - Electronic adjustment and control of key machine functions
  - Integrated safety, warning, and diagnostic features

Plus+1® is a registered trademark of the Danfoss Group.

# Prescription Quality

## Achieve superior results, faster.

The Rx's advanced, rotary threshing and high torque design enables earlier harvest of large green plants, tough stems and high plant foliage. This greatly increases the harvest window, allowing you to start earlier and finish faster.

- A. Easily interchangeable/removable concaves**  
Internal conveyor belt for optimum seed transfer and control
- B. Fully hinged panels for easy access to all subsystems**  
Advanced hydraulics minimize mechanical drives for increased precision and smooth operation
- C. Pivoting, hydraulically driven straw chopper for easy cleanout and access**
- D. Advanced air cleaning system with sieve and winnowing blower**  
Stainless steel fuel cell

Rx vs Alternative Model Performance Grid

Criteria	Alternative	Rx
Sample Cleanliness	> 97.5%	> 100%
Seed Damage	<2.5%	<1%
Plot Time	< 20 sec	<15 sec
Soybean Bulk Harvest Speed	2mph	3 mph
Plant Maturity Capability	7	10
Plot Loss	<2%	< 1%
Ground Speed	10mph	12mph
