- Equipment Purchasing
- Construction Management
- Dust Control

CONSTRUCTION SOLUTIONS

INNOVATIVE SOLUTIONS - EXTRAORDINARY RESULTS

At Bratney Companies, we partner closely with our customers during all phases of the design and construction process so that you can be confident with the results of your plant improvements. Every project is custom designed and built to exacting specifications. Our collaborative team approach on each project provides complete and cost effective results for our customers.

Our engineers specialize in civil and structural engineering, cost estimating, construction/installation, process flow, seed and grain cleaning and storage, dust control, milling, pneumatic/material handling, packaging, and warehouse/cold storage.

Our design department consists of professional CAD designers qualified to provide solutions to the most challenging design problems. Our design team uses state-of-the-art design software to assist with the development of superior design solutions for a wide variety of customer needs.

SAFETY & EFFICIENCY WITH QUALITY WORKMANSHIP

Bratney Companies employs exceptional safety standards. We complete projects safely, on time and with quality workmanship. Our site superintendents have an average of 20+ years of experience. The skilled concrete, building and millwright workforce has an eight to ten year average experience. By completing projects with our own personnel, we maintain better control of schedules and finished quality. Bratney Companies employs a full-time safety director with more than 24 years of field safety experience. Safety is a very important part of every job we do.

PROFESSIONAL SITE SUPERVISION & COORDINATION

From overseeing the installation of a single piece of equipment to the overall site management of your multi-million dollar project, Bratney Companies prides itself on professional management of the entire construction process. Bratney provides experienced, professional site supervision and coordination as required for the work. Our project superintendents oversee all day-to-day field activity, provide overall site and contractor coordination and monitor the progress of each trade or subcontractor with respect to the project schedule. Additionally, the project superintendent observes the work performed by the contractors with respect to the contract documents and quality.

COMPLETING YOUR QUEST FOR HIGH PERFORMANCE & PRODUCTIVITY

When the decision is made to build, renovate or acquire a facility, you can count on our experience to support you in this process. Our vast expertise in our core industries allows us to anticipate your needs and requests. We always go the extra mile to ensure maximum performance and productivity for your project. From conception to completion, we work with you through every step and stage of the process to ensure complete customer satisfaction.
